Kittipat Rattanakorn

Senior Backend Developer → looking to move into AI

Bangkok · kittipat.r@example.com · 080-000-0104 · github.com/example-kittipat

Summary

Backend developer with 6 years of Java and Spring Boot experience in fintech. Strong in cloud infrastructure and delivery pipelines. Recently used ChatGPT and GitHub Copilot daily and built a small internal chatbot prototype; now looking for an AI role.

Experience

Senior Backend Developer — Krungthep Pay Co., Ltd. (2021 – Present)

- Led the payment gateway team (5 devs); 2,000 transactions/second on Kubernetes (EKS).
- Migrated 30 services to Docker and GitHub Actions CI/CD; release time cut from 1 day to 40 min.
- Prototype: FAQ chatbot calling the OpenAI API from a Spring Boot service (internal demo only).

Backend Developer — Lanna Soft Co., Ltd. (2019 – 2021)

- Built REST APIs with Java, Spring Boot and PostgreSQL for an e-procurement system.
- Wrote complex SQL reports and tuned slow queries (p95 from 3.2s to 400ms).

Education

B.Sc. Computer Science — Chiang Mai University, 2015–2019

Skills

- Java, Kotlin, Spring Boot, SQL, PostgreSQL, Redis, Kafka
- AWS (EKS, RDS, S3), Docker, Kubernetes, Git, CI/CD, Terraform
- AI tools: ChatGPT, GitHub Copilot, OpenAI API (basic)

Certifications

- AWS Certified Solutions Architect – Associate (2023)
